

Return to Girl Scout programming after COVID-19 illness or diagnosis

Girls and adults who have had COVID-19 symptoms and/or have tested positive for COVID-19 may resume Girl Scout meetings and activities after meeting the requirements below. These guidelines are based on CDC guidance and the recommendations of several school districts.

COVID-19 positive, with symptoms

Girls and volunteers/parents who test positive for COVID-19 and exhibit symptoms may participate or chaperone Girl Scout events and activities (including troop meetings), when **ALL THREE** of the following statements have been met:

- It has been 10 days or more since the individual first had symptoms;
- It has been 3 days or more since the individual had a fever (without medication); and
- It has been 3 days or more since coughing and shortness of breath have improved.

COVID-19 positive, with NO symptoms (asymptomatic)

Girls and volunteers/parents who test positive for COVID-19 and do not exhibit symptoms may participate or chaperone Girl Scout events and activities (including troop meetings) 10 days from the time the individual tested positive, assuming no symptoms have developed.

If symptoms subsequently develop, follow the guidelines for COVID-19 positive above. An individual must be symptom free for 10 days starting from the date the first symptom occurred.

No COVID-19 test, but exhibiting symptoms

Girls and volunteers/parents who exhibit symptoms for COVID-19 (but have not been tested) may participate or chaperone Girl Scout events and activities (including troop meetings), when **ALL THREE** of the following statements have been met:

- It has been 10 days or more since the individual first had symptoms;
- It has been 3 days or more since the individual had a fever (without medication); and
- It has been 3 days or more since coughing and shortness of breath have improved.
